As more people choose multi-level residential living, the issue of sound insulation has never been more important. Whether it's in a townhouse, apartment, or two storey home, the sound of footsteps, moving furniture, or falling items can be annoying.

To tackle this problem Dunlop has developed Advantage 3, a rubber/cork recycled hard flooring underlay that delivers outstanding acoustic performance that easily surpasses the industry standard set by the National Construction Code (formerly known as BCA) supporting your new floor for many years to come.

That's why Dunlop Advantage 3 is a sound choice.
